CONTENTS

A similarity approach to turbulent sediment-laden flows in open channels. D. A. Lyn *page* 1

On shear layers in mixture separation in rotating containers with inclined walls. M. Ungarish 27

Sound waves in monodisperse gas–particle or vapour–droplet mixtures. N. A. Gumerov, A. I. Ivandaev and R. I. Nigmatulin 53

A new theory of the instability of a uniform fluidized bed. G. K. Batchelor 75

Low-Reynolds-number instabilities in stagnating jet flows. J. O. Cruickshank 111

Arrested shear dispersion and other models of anomalous diffusion. W. R. Young 129

Monolayer flow on a thin film. Michael S. Borgas and James B. Grotberg 151

Unsteady attached cavitation on an oscillating hydrofoil. J. P. Franc and J. M. Michel 171

Nonlinear instability and break-up of separated flow. S. N. Brown, H. K. Cheng and F. T. Smith 191

On the viscous deformation of biological cells under anisotropic surface tension. Daniel Zinemanas and Avinoam Nir 217

The nonlinear development of Görtler vortices in growing boundary layers. Philip Hall 243

Peristaltic pumping in circular cylindrical tubes: a numerical study of fluid transport and its efficiency. S. Takabatake, K. Ayukawa and A. Mori 267

Visualization of coating flows. Peter M. Schweizer 285

The bursting sequence in the turbulent boundary layer over progressive, mechanically generated water waves. Yiannis Alex Papadimitrakis, Robert L. Street and En Yun Hsu 303

The effect of secondary motion on axial transport in oscillatory tube flow. T. J. Pedley and R. D. Kamm 347

Resonant oscillations in shallow water with small mean-square disturbances. J. G. B. Byatt-Smith 369

Natural convection in a long vertical cylinder under gravity modulation. M. Wadih and B. Roux 391

Reheat buzz: an acoustically coupled combustion instability. Part 1. Experiment. P. J. Langhorne 417

Reheat buzz: an acoustically coupled combustion instability. Part 2. Theory. G. J. Bloxsidge, A. P. Dowling and P. J. Langhorne 445

Spiral structures and spectra in two-dimensional turbulence. Andrew D. Gilbert 475

Direct numerical simulations of the effects of shear on turbulent Rayleigh–Bénard convection. J. Andrzej Domaradzki and Ralph W. Metcalfe 499

First-order wall curvature effects upon the Stokes resistance of a spherical particle moving in close proximity to a solid wall. Adebowale Falade and Howard Brenner 533

On the nonlinear interaction of Görtler vortices and Tollmien–Schlichting waves in curved channel flows at finite Reynolds numbers. Q. Isa Daudpota, Philip Hall and Thomas A. Zang 569

Reviews 596

An Introduction to the Theory of Climate, by A. S. Monin 596

Principles of Combustion, by Kenneth K. Kuo 597

Corrigendum 599
